Enolgas Bonomi SpA

The company was founded in Concesio (BS) in 1960 and today it heads the whole Group.

It manufactures and markets the full production of the Enolgas brand, i.e. manually operated brass valves and motorised valves, industrial stainless steel valves and integrated systems for the safety and home comfort.

www.enolgas.it

Enolgasitech srl

The company is based in Sale Marasino (BS) and it was founded in 2010.

It is specialised in the production of metal structures and rack cabinets.

Here is the new partner who gave renewed impulse and opened new scenarios, allowing the Group to diversify its business with the rack cabinets and to differentiate itself from the competition thanks to a wider range of metal sheet products for the sanitary and heating fields.

www.enolgasitech.it

Bongas Deutschland GmbH

Trading company established in 2001 headquartered in Oberkirch.

Specialised in the distribution on the German market of gas ball valves, motorised valves and steel valves for the industry and the sanitary & heating sector.

www.bongas.de

Enolgas USA Inc.

Trading company established in 2008 with headquarter in Fort Lauderdale.

Specialised in the distribution on the U.S. market of mechatronics products and components for air conditioning.

www.enolgasusa.com

Bongas Brasil Ltda.

Trading company established in 2002, with headquarter in São Roque.

Specialised in the distribution on the Brazilian market of motorised valves for the industrial and HVAC field, of ball valves for gas and water.

The Group

ENOLGAS BONOMI S.p.A. is one of the leading international manufacturers of ball valves and cocks for plumbing, natural gas distribution and industry.

Founded in 1960 as a family business, **ENOLGAS BONOMI S.p.A.** is a Company with a significant and strong history.

In 1991 **ENOLGAS BONOMI S.p.A.** Quality System obtained ISO 9001 certification for design, manufacturing and service.

Today **ENOLGAS BONOMI S.p.A.** is an international oriented company, with subsidiaries and representative offices around the world. With 3 production divisions in Brescia area (Northern Italy) and a comprehensive product range, the **ENOLGAS Group** has the right solution for residential buildings or industrial applications.

The Evolution

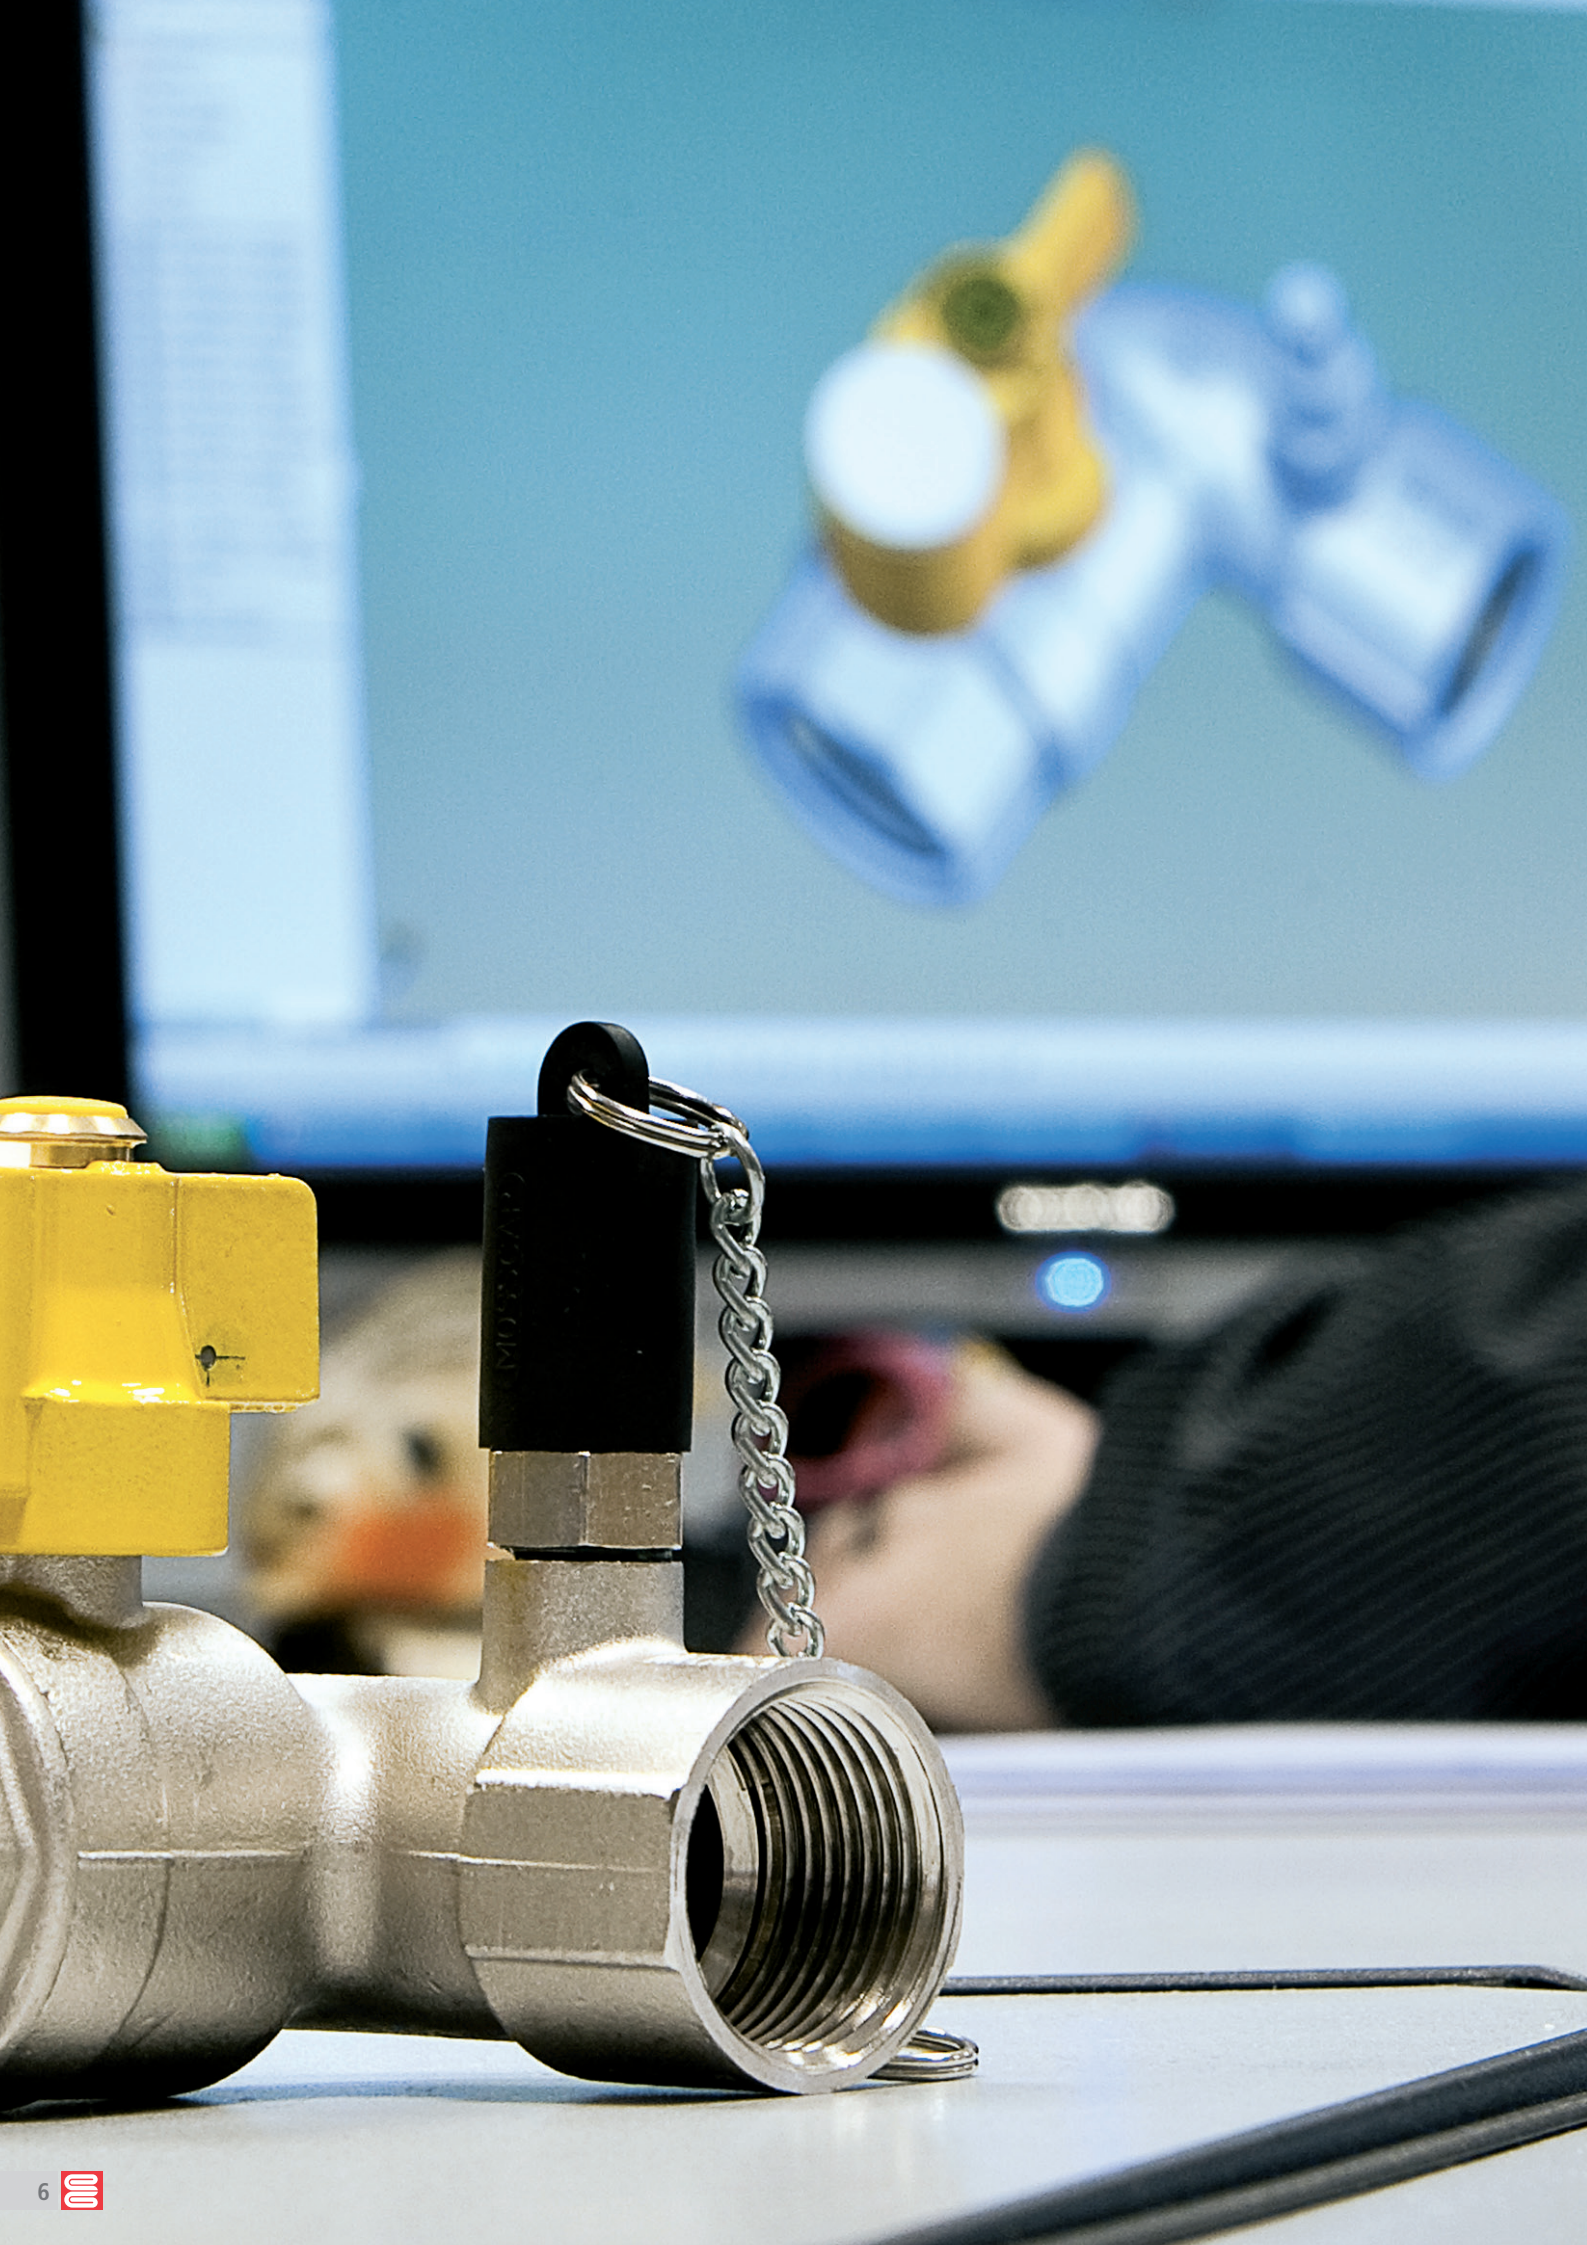

The specialization in brass ball valves - which was the foundation of the company - today is just one of many product lines of the Enolgas Bonomi group.

To expand its market into new areas, Enolgas Bonomi created, in recent years, a number of products and services, designed to serve different markets and distribution channels.

In addition to traditional brass ball valves, today's product line also embraces stainless steel valves for industrial plants. The creation of the Systems Division which focuses on the development of products for home automation and environmental sustainability is of great importance in today's markets.

The Systems Division is a part of one strategy of recent years, to bring innovative trends to the market and intended to characterize the development of Enolgas Bonomi production in the coming years.

Research and Development

ENOLGAS BONOMI S.p.A. strives to maintain product excellence and innovation, collaborating with University Departments by developing new industrial inventions and editing their R&D achievements.

The Divisions

Two and Three-way brass valves

The historical strong core business of Enolgas Bonomi.

Valves for water and gas domestic use.

Valves for industrial use.

Motorized valves.

Industrial Steel Valves

Valves for industrial plants for food, petrochemical, pharmaceutical, storage and pumping gas/fluids.

Systems Division

Home automation, thermal energy metering units, HVAC components.

Water and gas leakage detection systems.

Brass & Motorised Valves

Gas ball valves

Safety gas valves

Gas valves with testing port

Built-in gas valves

Flexible hoses for gas and joints

Fittings

Water ball valves

Ball bib-cocks

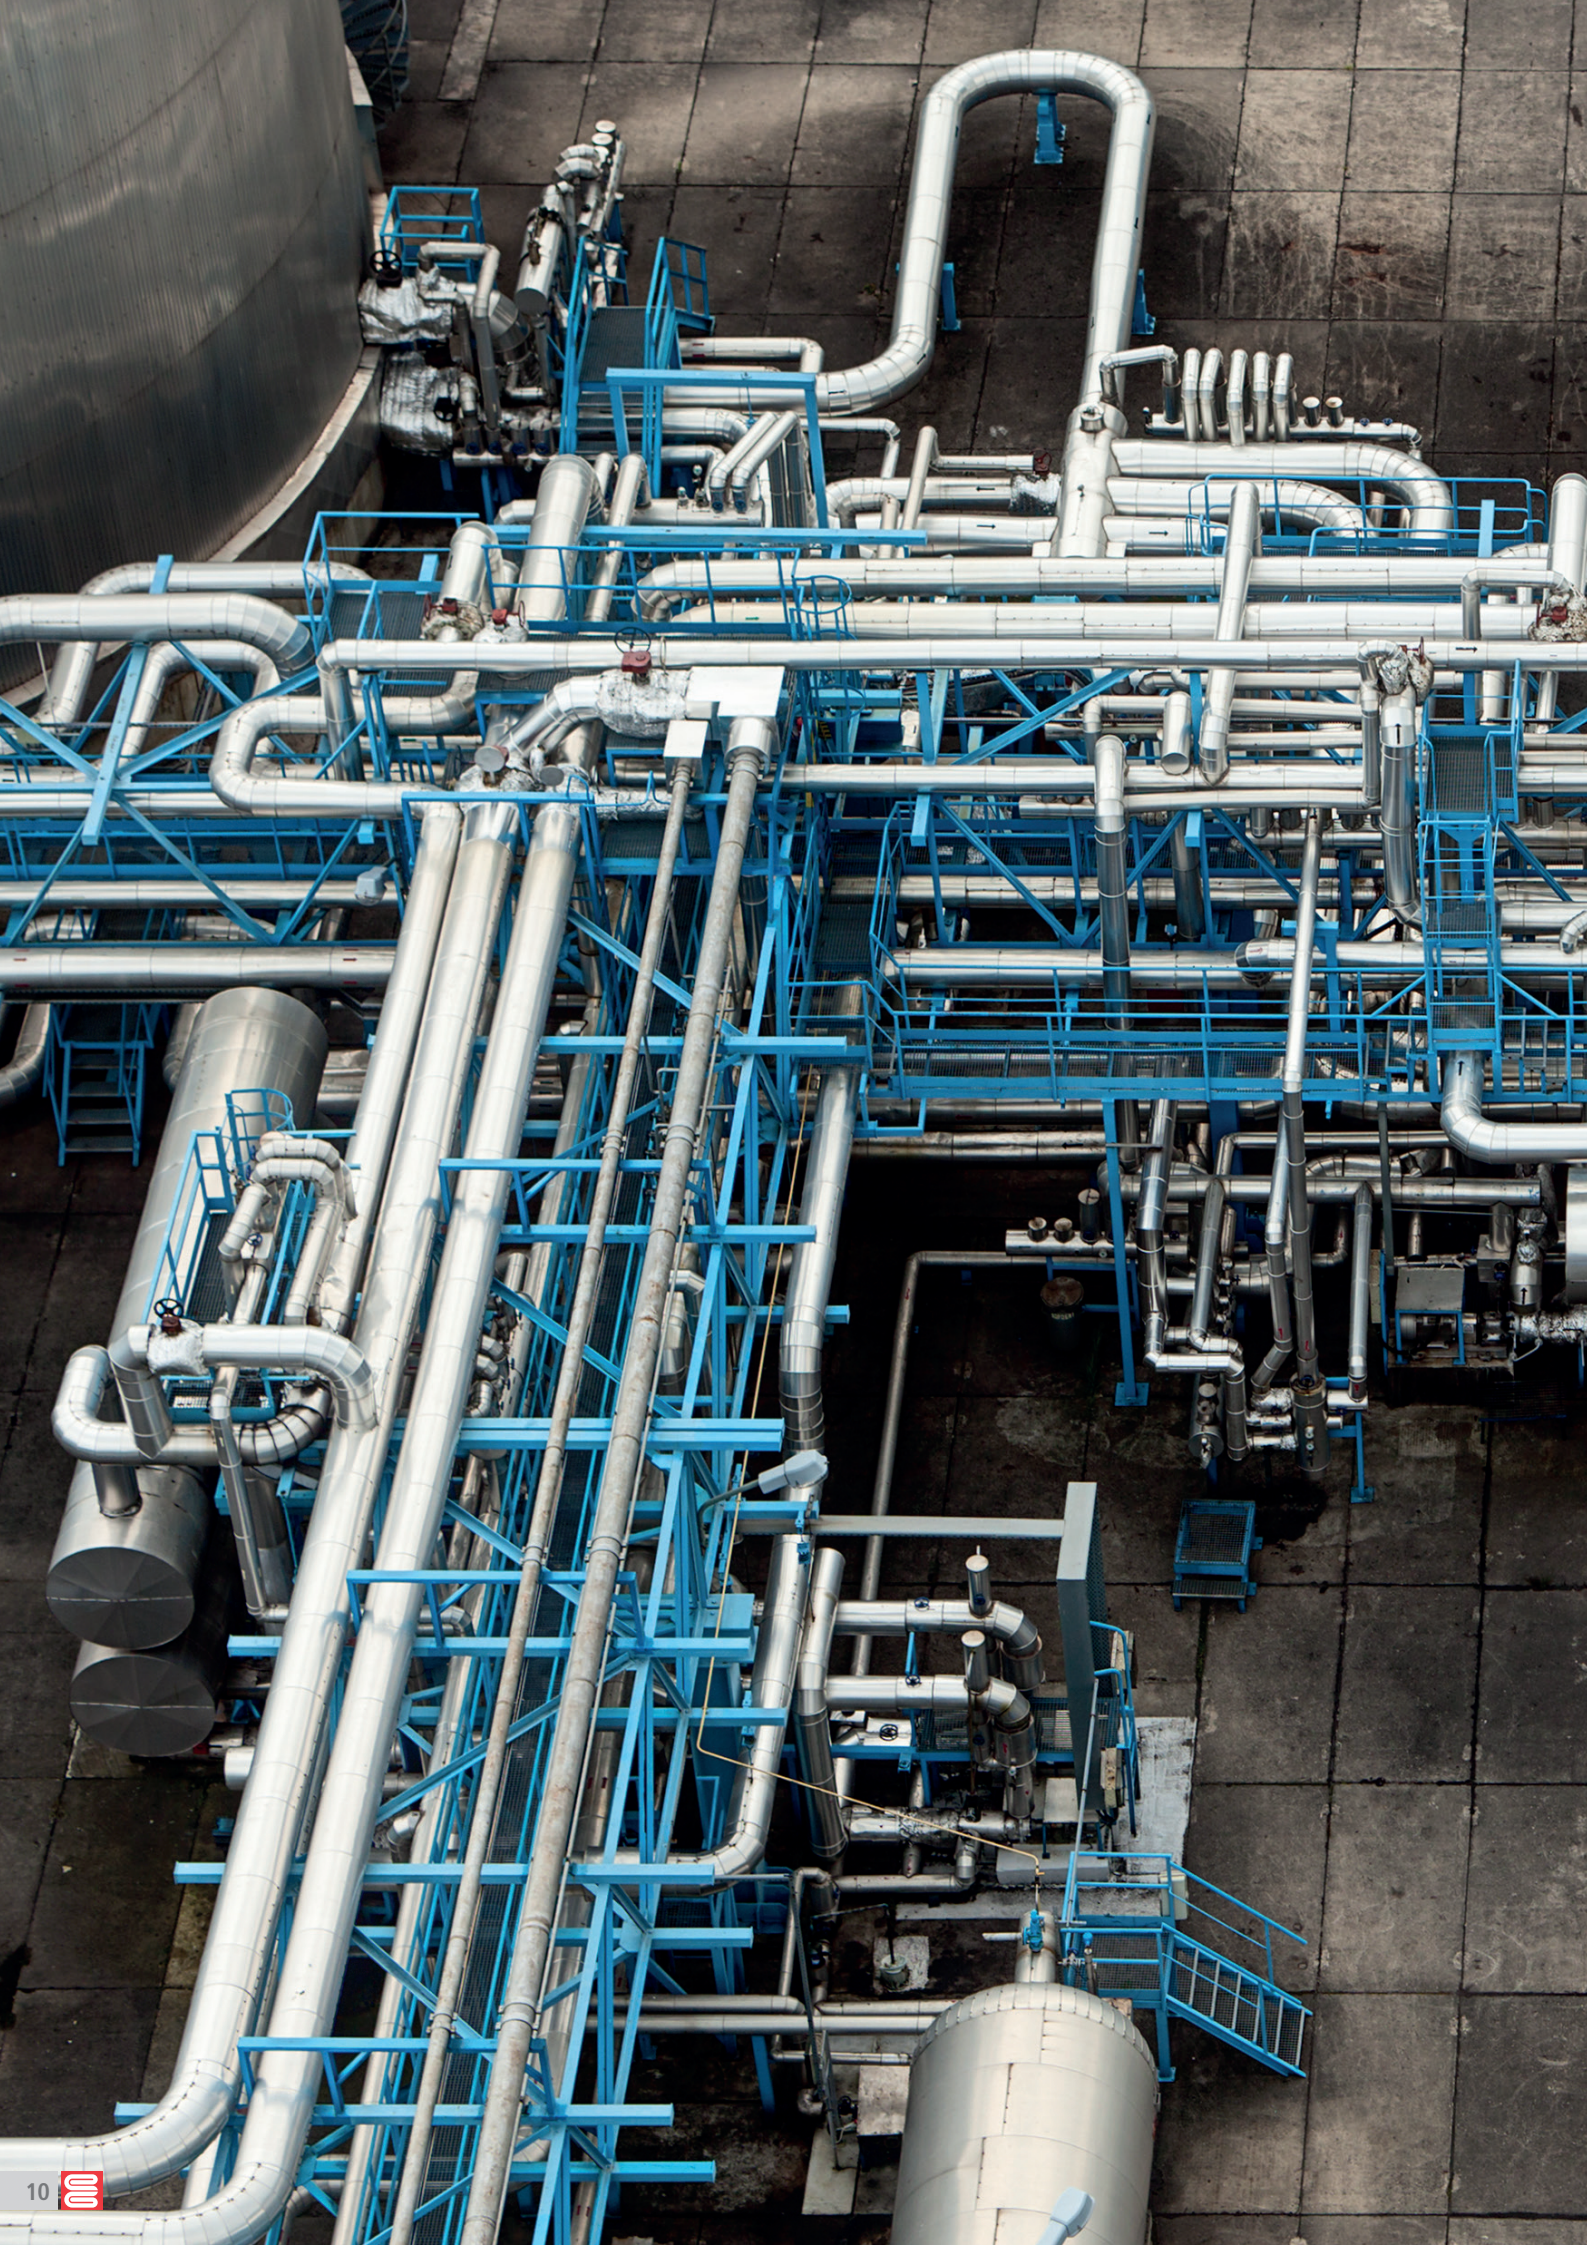

Check valves

Watergates

Multilayer systems

Motorised valves

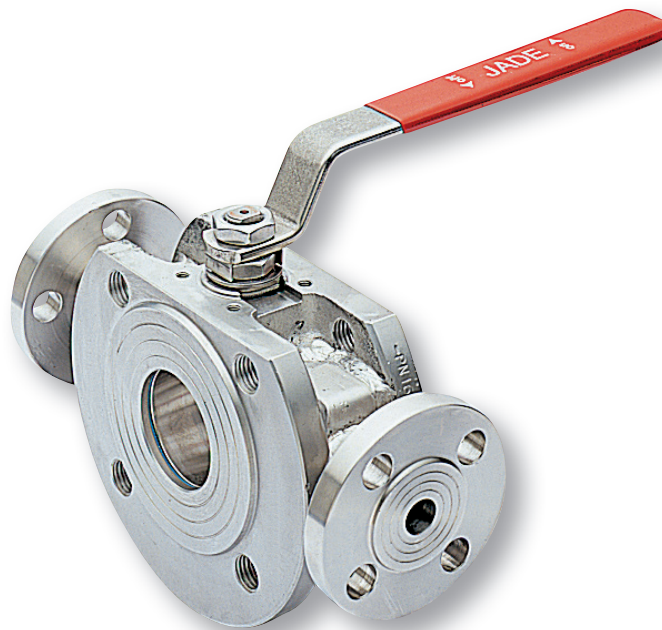

Industrial Valves

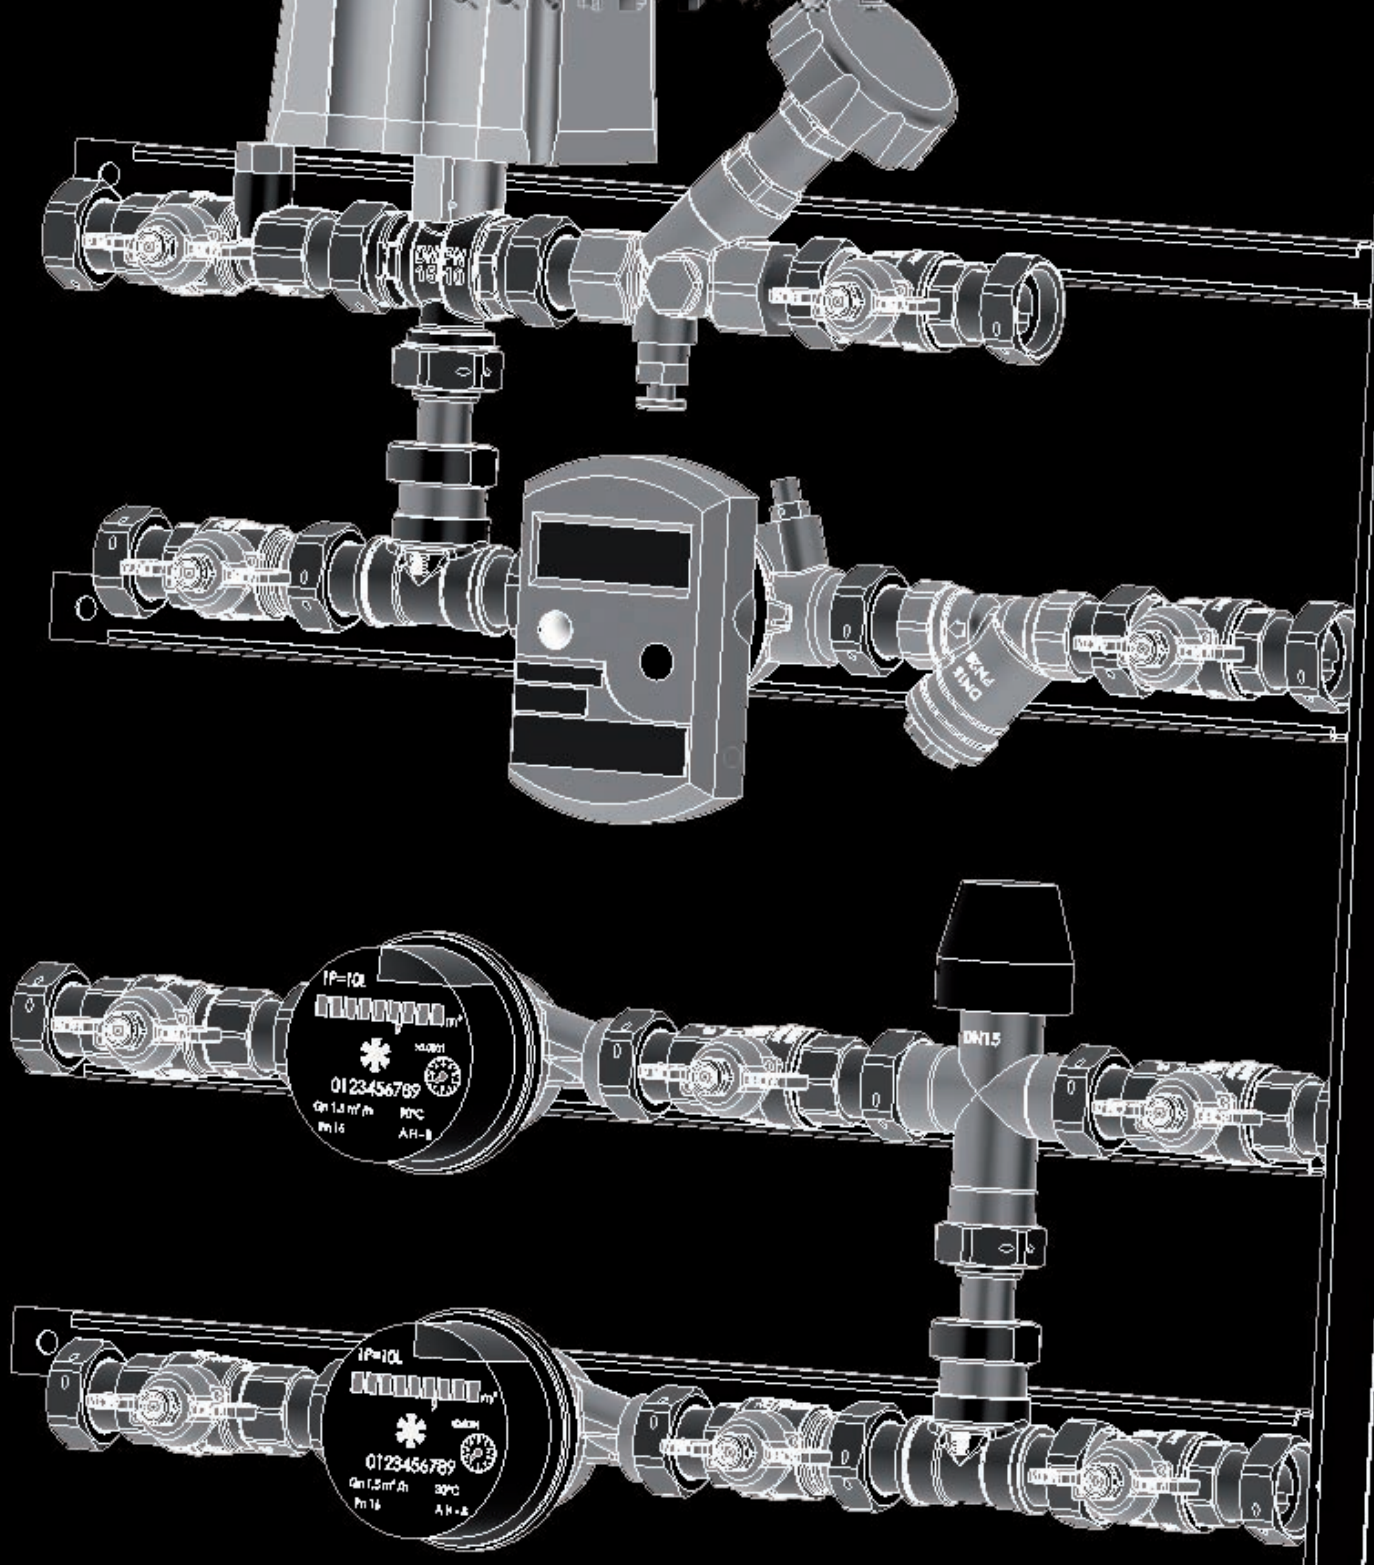

Valves for industrial plants for food, petrochemical, pharmaceutical, storage and pumping gas/fluids.

Two and three way ball valves in stainless steel and carbon steel

Wafer and split-body ball valves in stainless steel or carbon steel

Pneumatic and electric actuators

Systems Division

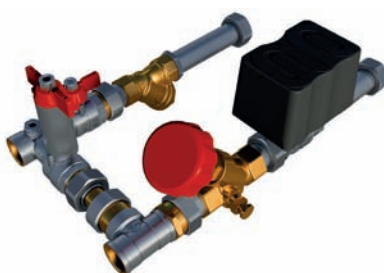

Integrated systems in the service of home automation and environmental sustainability: accounting for heat, automatic thermostatic valves and pressure static, LDS systems for the interception of loss of water and domotic nodes to prevent leakage of gas / water and the climate management of environments.

Systems Division

ENERGY•SAT

It is a device created to distribute heat and sanitary water from the production in a centralized system, ensuring the consumption regulation and metering.

HVAC COMPONENTS

Motorised valves and actuators for HVAC applications. FCU LINKUP UNITS, complete and pre-assembled solutions to reduce installation time and to optimize commissioning.

LDS-LEAK DETECTION SYSTEM

It is a device created to intercept water microflows and drippings and to prevent flooding. The system can be integrated with optional equipments.

LDS was granted the CE certification as it complies with the essential requirements to be sold and used in the EU.

Quality

Quality Assurance department selects and continually reviews all of the subcontractors and suppliers, as well as checking all incoming materials physically, dimensionally and functionally. Finally, before packing, all products undergo tightness and functional tests.

The Quality Assurance department is staffed by highly qualified personnel who not only check the quality of the product, but also promote methods and techniques for implementing Total Quality Assurance. It is thanks to this commitment that Enolgas was awarded ISO 9001 by I.C.I.M. (The Institute of Industrial Certification for the Mechanical Industry) in 1991.

Through the years Enolgas has received various certifications from the most important international certifying bodies which guarantee the excellence and quality of our products.

The aim of the Company is to guarantee the quality content of every production, process and product, beginning with human resources.

People play a primary role in the philosophy of Enolgas. The Company integrates at all levels professional skills and experiences to reach the intended goals. Human resources are continuously focused in development of new products and better service to the customers, whilst a most advanced testing and research laboratory works every day to solve the demands of the end users.

**UNI EN ISO 9001:2008**

Compliance of the entire production with the standards of the quality system as defined by ISO 9001:2008.

UNI EN 331

Conformity of ball valves for gas with the requirements of European technical standard EN 331.

ICIM "P" Certification

Conformity of ball valves with the technical standards relating to safety, reliability and product quality, certified by ICIM.

PED Certification

Conformity of pressure equipment, in accordance with the safety requirements established by the European Directive PED (Module H).

The Certifications

The quality and accurate compliance with reference standards are two attributes on which Enolgas Bonomi has always invested: in 1991 the company achieved ISO 9001 certification for design, production and customer service.

An excellent result for that period, which Enolgas Bonomi wants to maintain over time, through close collaboration with the departments of university research and upgrading activity for its products under the specifications and standards of the different markets.

The production is certified by external bodies and provides qualitative and functional testing to 100% of finished products.

In addition, some product lines are also subject to voluntary certification of products, with direct withdrawal by third party, in the production departments during machining, assembly and testing, in order to offer its customers the best guarantees in terms of quality and safety.

A basic focus on quality and innovation, which can fit only in one company able to look forward with confidence to the future.
